About PROSPECT | Idea

Key questions:

- How can public authorities **carry out simple energy interventions** to secure investments for joint initiatives that span local and regional boundaries?
- What can public authorities **learn from successful and less successful projects and initiatives** and about planning and design phase to accessing funds, developing financing schemes or better access to finance, tracking impacts and benefits through monitoring and reporting systems?
- What kind of support do they need to **enhance their capacity**, to help deliver an **energy transition**?

Need for 'peer to peer learning for public authorities – step up public authorities' capacity to help deliver the energy transition.

About PROSPECT | who we are

Good practices

The screenshot shows a web browser window with the URL `h2020prospect.eu/library/goodpractices`. The website has a header with the PROSPECT logo and navigation links: HOME, GET INVOLVED, LEARNING PROGRAMME, LIBRARY (highlighted), ABOUT, and HELP & CONTACT. Below the header, there are four teal buttons: Ecoreno's, PV Investments, ASCM - Assen Model, and Sustainable Topp. The main content area features a section titled "Transport" with a description: "Covers the provision of and management of mass transit systems by public authorities, as well as private transport." Below this description is an icon of a car and a bus. Under the icon are five green buttons: REMOURBAN, TransformingTransport, S2city, PEPE4TRANS, and CENCYL+. Below the Transport section is a section titled "Public Lighting" with a description: "Covers the provision of public lighting (e.g. street lighting and traffic lights) owned or operated by public authorities. Non-". The website is displayed on a Windows 10 desktop environment, with the taskbar showing various application icons and the system clock indicating 19:25 on 01/07/2020.
